Erika 3005 electronic

robotron

The Erika 3005 electronic is an efficient portable typewriter with display and internal text memory. A well-balanced outfit of functions and the ease of handling ensure a high typing comfort.
A 16-figure LCD display for text control enlarges the possibilities of correction, aids the user in operating the typewriter and converts the Erika 3005 electronic into the typing pro for private and semiprofessional users.
Decimal tabulator, centring, indentation, extra bold print, automatic underline, right-hand flush typing and grouped style are functions which enable the typist to give the correspondence a representative appearance.

Daisy wheel in a drop-in cassette
No more dirty fingers and no fear of wrong inserting or even damaging of the daisy wheel. The daisy wheel is exchanged together with the cassette – a really very simple procedure which permits to change the type style in a few seconds.

Ribbon in a drop-in cassette
No troublesome threading through the ribbon fork. The ribbon cassette is simply fitted on and pressed a little – that's really very easy. So the ribbon exchange becomes a matter of only some seconds.
